= Reduction in critical situations

# Do They Know What To Do

# Did You Know

A full size school bus has 24 seats and can transport up to 71 young students. That's about 3 times the average class size of an elementary school class.

If you are looking in the mirrors constantly or searching for things all over the bus it is a sure recipe for disaster.

# You As Professionals

We as professional trainers, can help prevent accidents by simply remembering:

- Driving is a job that requires your full attention. Take time help the drivers get to know their vehicle before getting behind the wheel.
- Help a driver remember to reduce driver distractions and focus on driving tasks.
- Your first responsibility is to road safety. We are hauling America's future. Lives can not be replace.
- Be a leader not a follower.

Always remember it takes all kinds of people to help educate children in school.  
But it takes a special person to be a Bus Driver.
